

# Social Language Development Test- Elementary

**DVD presentation by:  
Linda Bowers, M.A. & Rosemary Huisingh, M.A.**

**Facilitator: Daniel F. Dardiz M.A. CCC-SLP**  
Friday June 18<sup>th</sup> 2010  
UCP Holloway Conference Center

## **Activity Description**

This course examines the research regarding social language development, the standardization study results the test gathered on more than 1100 subjects, and how language functioning and social skill development are related. Discrete skills related to social language functioning will be identified. Recommendations for further research are included.

## **Learning Outcomes**

1. Summarize pertinent research on social language skills usually developed by kindergarten.
2. Understand early childhood development of social language.
3. Identify important social language skills to include in the curriculum for students with autism or language disorders, based on a developmental hierarchy.
4. Understand the connection between language functioning and the development of social skills.
